Within the library, the librarian is responsible for ordering and receiving requested materials and maintaining the business records necessary for the fiscal control of library budget. Cooperation between faculty members and the librarian in the selection of materials allows individual faculty members to bring their specialized knowledge to the task of selection and to assure the support within the collection of

specific curricula needs. The responsibility of the librarian is to ensure that no areas of development proper to the collection be ignored or slighted and that the collection as a whole be developed objectively, consistently and thoroughly.

Book and Periodical Orders

Book and periodical orders come primarily from faculty and library staff. However, students and University employees may suggest book purchases to the librarian who will consider placing an order for the recommended items. The final decision to purchase any library materials rests with the library committee. Allocations are based on the availability of library funds.

Each academic department receives a portion of the annual materials budget allotted by the Library Management Committee. This committee is composed of one representative from each academic department, a student representative and the librarian.

C. Special aspects of collection management i. Paperbacks

When there is a choice between hard cover and paperback, the paperback will be purchased unless the work is one expected to stand up to frequent and heavy use.

ii. Periodicals

Current subscriptions are placed at the request of faculty and on the basis of the expressed needs and interests of the library's users. Every year, prior to renewal dates, the library informs faculty members as to which titles are available in the library's full-text databases. Faculty members are asked to review their orders and to consider canceling the print versions that are duplicated online.

iii. Newspapers

The library shall subscribe to representative national newspapers. Due to limited storage space, back-files of newspapers are not kept beyond three months.

iv. Foreign Language Materials

Materials in foreign languages are purchased to support the language curricula offered by NIIT and when a specific need is evident for a foreign language edition.

v. Materials not used regularly

Resources (books, manuals, indexes, periodicals, dissertations) and information needed to support the research of an individual student or faculty member are obtained, whenever possible, through interlibrary loan rather than through purchase.

vi. Out-of-Print Materials

Out-of-print materials are sought through the catalogs and Web pages of out-of print book dealers and services of major book jobbers.

vii. Textbooks

Textbooks are purchased, and free copies are accepted, only when they supply information in areas in which they may be the best or the only source of information on the subject.

viii. Audio-Visual Media

The library acquires a limited number of recordings, CDs, DVDs and videos. These are selected on the basis of course needs and general interest to the Library's clientele, largely on the recommendation of the faculty. As for adding other A-V materials to the collection, the general policy is to select materials which will best serve the purposes of the students.

ix. Theses

The library may accept and maintain a printed copy of a graduate theses and project papers, or University scholar papers, from its thesis office or institutional repository.

x. Electronic resources

For the purpose of this collection policy, electronic resources are defined as reference or indexing sources, either as full-text and/or as citations, which require computer access. The Library Management Committee will collectively vote on new acquisitions. Electronic resources are subject to contracts negotiated with the respective suppliers.

In selecting electronic resources the following criteria will be followed:

- Speed and efficient access for users as compared to print version of material
- Cost effectiveness (start-up and maintenance costs in relation to number of academic programs served)
- Ease of manipulation
- For bibliographic databases, a high percentage of the titles found in the indexing/abstracting database should be owned by or be accessible to the Library
- Shelving space available for physical forms of the database contents Additional criteria:
- Accuracy and authenticity

- Scope and depth of coverage
- Historical perspective as well as currency of data
- Ease of use (e.g., special indexing/browsing features).

xi. Gifts

The library welcomes gifts but accepts them with the understanding that it has the right to handle or dispose of them in the best interest of the institution. The library will determine the classification, housing and circulation policy relating to all gift items.

xii. Maintenance of the collection

Library materials are expensive to purchase, process, and house. The library acknowledges the necessity of preserving all holdings, both traditional and nontraditional. Library staff and users are informed about proper care and handling of library materials in all formats. In addition, temperature and humidity within the building are controlled for maintenance of library materials.

Deteriorating materials in the collection shall be reviewed by the librarian. He/she shall determine if the material can or should be preserved. If the material can and should be preserved, appropriate action will be taken to restore the material to a useful state. If the determination is that the material should not be restored, it will be weeded from the collection. The librarian, with advice from the faculty, will determine if the material is to be replaced.

xiii. Weeding

The Library shall keep the collection current through a regular, continuous process for removal of materials which are no longer useful. Therefore, it is the job of the professional librarian to survey the collection throughout the year so as to determine the materials' usefulness in the curriculum. Faculty members in affected subject areas will be consulted before materials are removed from the collection. BlueCrest University Library shall conduct systematic programs of weeding from the general library collection. Decisions to withdraw are made in consultation with the faculty member of the academic discipline most directly concerned with possible future use of the resource. Factors involving decisions to weed are based include:

- Works of a timeworn appearance which are not necessarily rare or of considerable value in terms of either content or actual marketability
- Unneeded duplicates
- Earlier editions which have been superseded

- Editions in non-English languages in which the English version is held by the library and the foreign language material does not relate to course offerings or support faculty scholarly needs
- Works with outdated or incorrect information
- Books over 30 years old which have not circulated for the last 10 years
- Ordinary textbooks and school dictionaries
- Superseded almanacs, yearbooks, and manuals
- Old students course outlines

All materials which are weeded should be properly reported in the annual inventory report and should be properly marked so as to not reappear on the shelves.

xiv. Intellectual Freedom

The library is not biased on any issues and seeks to maintain a free flow of information in the selection of books. The disapproval of a book by one group shall not be a means for denying that book to all groups if, by library selection standards, it belongs in the collection. Any patron who wishes to challenge a library material on the shelves should contact the librarian.
