Blue Crest Wins CSO Independence Day Best IT Institution Award

Blue Crest University College Liberia Inc. has won the civil society National Independence Day outstanding and best I.T institution of the year award for its excellent, outstanding and reliable Information Technology (IT) education and training since its establishment here in Liberia.

The award ceremony which took place at the colleges newly constructed head office in Congo Town brought together senior staff of the college, officials and staff of the Society for the Promotion of Peace and some members of the press. Presenting the Award to the marketing manager of the university Mr. Abhishek Tiwari, the general coordinator of the pro-democracy group Mr. James M. Copson highly commended and praised the management and staff of the university, for their excellent I.T education

and training in the country which Mr. Copson described as remarkable and deserves commendation.

Mr. Copson further said that the selection of the college out of several I.T institutions was done through a vetting process which was very credible and transparent.

Mr. Copson then urged the management of the college to extend their services to other parts of Liberia for others to benefit from their IT and fashion design training programs.

Receiving the Award on behalf of the college the head of marketing, Mr. Abhishek Tiwari thanked the organization for the preferment and further said that the Award will serve as a motivational force to continue to prepare the future generation to be fit for the job markets.

He then also used the occasion to extend special

thanks and appreciation to the National Commission on Highest Education for granting the university a permanent permit to offer undergraduate degrees in Information Technology (IT) and management and then concluded by unveiling plans by the university to shortly start the Master's Degree program. Blue Crest University College begins operation in Liberia in 2014 and became a degree

awarding institution on April 21, 2015. It is involved in I.T. education and training, management and fashion designing courses. Its program is design as per the requirement of most of the I.T companies and ET departments of all organizations. Its program also covers everything related to software and networking.

Abstract

Lung cancer progresses rapidly, so early detection is crucial the initially use the Internet of Things for early-stage lung cancer diagnosis (IoT). Training for the IoT devices is in real time is crucial they have IoT connectivity all over the world, and great trust in the model's accuracy, both of data. Early detection of disease will save hundreds of thousands of lives every year it completely seals off the airways, which could lead to infection. Malignant growth was first observed with picture-processing and learning systems. The signs of lung cancer usually don't appear until the disease has spread. This is where medical attention becomes most challenging

BLUECREST LIBERIA

"Resource Personnel for Conclave"

Poem

CRUSHED, I AM

By: James Foday Kawah, Jr.

Down the drain, it's gone
My love's been trampled on
Crushed by one who claimed it once
For another who's void of warmth
How could this be?

I'm now in awe
For the words that once came forth
Were full of ecstasy
Joy and hope-filled my emptiness

Thoughtful, I am, how this be
For you, my love is ever free
Free to love who you want
Though my heart is ever crushed.

I wish I could kill my heart
for loving you like crazy
I wish the first time I saw you,
I could turn my back and walk away.

Crushed, I am.
